

Online Bid System Announcement

Columbus Regional Airport Authority is pleased to announce its new Online Bid System. The web-based software system is accessible to all prime and sub-firms of various disciplines, and includes the following key features:

Log into the system and click “VIEW ACTIVE BID OPPORTUNITY LISTINGS” where you can easily:

- View solicitations
- Become a planholder
- Add a due date to your calendar
- Submit a bid

Submitting a bid through the B2Gnow system will allow you to:

- Ask questions and receive answers within the bid module
- See the required documents with descriptions and easily attach the file
- Acknowledge that you have seen an amendment
- See a bid clock countdown that show the days/hours/minutes/seconds remaining as well as the due date
- Please note your bid will be sealed until the official bid opening

Our “go live” date is Friday, May 15, 2020 after which all the above functions will be processed online through our system. The system is available 24 hours a day, 7 days a week, and permits users to submit bids anytime.

Please assist us with our system roll-out by logging into your account or creating a new account, updating your password if appropriate and reviewing the contact information for your business. You will be able to view and respond to solicitations as appropriate.

To access the system, visit the following link: <https://columbusairports.diversitycompliance.com/>. If you have never logged on or do not know your username and password, click the Account Lookup link below the Login button. Questions may be submitted electronically to CRAAProcurement@columbusairports.com. Technical support is available at [Customer Service](#) from the system provider (B2GNow).

Thank you in advance for your participation. We look forward to the implementation of this program, which will increase the efficiency and effectiveness of our procurement process.

Sincerely,

Karmin Bailey
Senior Manager, Procurement & Business Diversity
Columbus Regional Airport Authority
